You know..... some people argue that there is a "quiet" guitar played b4 the solo and say there isn't...or theye can't hear it....so..... if you watch them live or talk to figure it out. And, some people say its half step tuning...and other say its Drop D me....i use both sometimes....but it says better in Drop D...lol...so play it however you want to...or wut ever sounds better to you
